

CISLUNAR

Immersive electronic composition
performed live with guitar and visuals.

Cislunar is a London-based electronic composer and hybrid live performer blending melodic techno, improvised electronic textures, and live guitar. His performances merge club-driven momentum with cinematic atmosphere, shaping immersive sets in real time.

Performing across live electronic events, radio shows, and interdisciplinary art spaces, Cislunar's work bridges underground electronic music with expressive instrumental performance. Whether delivering a hybrid DJ + guitar set or a fully improvised live electronic show with visuals, his focus is on impact, tension, and emotional release.
